Wednesday: 0 Flash Cards * 0 min each = 0 Min MAX

*Remember picture yourself making flashcards. That's how fast you should study the concepts. Should be able to do 3 cards/slides

1. So far 2 days in a row writing. Third day is just flash card like THEN ALLOCATE STARS

2. Maybe 2 days in a row of the *** then the third day do no star

3. No stars = 4 days off ie → Thursday, (FRIDAY OFF), (SATURDAY OFF), (SUNDAY OFF), (MONDAY OFF),

    i. Monday → Saturday

4. Start with 2 stars → 0

7 Days (Three days in a row). For Non stars. Fine. Revise by thinking + stick to 2 mins per question + may have to look at answers.

Must restar 1st day

Then repeat all for day after

Therefore, if you slack off it requires 2 days of hard work
