ICT171 Introduction to Server Environments and Architectures
Assignment 2 - Cloud Project

Student Name: Jin Chong

Student No: 33170193

Mark: 28 / 30

Grade: HD

	Component		Grade
1	**Functionality, accessibility and documentation of the server**		
	Functionality, accessibility		9 / 10
	Documentation (Content, Grammar, Formatting, References, etc.)		4 / 4
Comment		**Mark:**	13 / 14
Wordpress blog and self-hosted Git repository deployed. Documentation is complete, although some simple tasks (like launching an instance) could have been described in a little less detail without any loss of comprehensibility.			
2	**Functionality, accessibility and documentation of the server's DNS entry**		
	Functionality, accessibility		4 / 4
	Documentation (Content, Grammar, Formatting, References, etc.)		2 / 2
Comment		**Mark:**	6 / 6
Domain name accessible with static IP address assigned.			
3	**Server Scripting**		
	Creative or useful script/code		3 / 3
	Documentation and comments to describe what and how the code works		2 / 3
	Verifiable output - so we can see the output or outcome of the code		4 / 4
Comment		**Mark:**	9 / 10
Simple server status logging and backup script implemented. Screenshot of code is difficult to read due to size; code should have been listed as text. Functionality and operation well described in Youtube video.
