- [Analysis *Phase*]

- **[How to create domain modelling class diagram]: Explain**

1. How to create domain model class chart

- Underline nouns (domain name) in green every time you see one
- Underline attributes in black

Different format for noun technique:

- **Booking** (work out)
  - Booking ID
  - Number of dogs*
  - OwnerID*
  - bookingDate
  - bookingTime

- **Dog**
  - DogID
  - dogName
  - Breed
  - Size
  - Age
  - Special notes

  - OwnerID*

Notice: Primary and foreign keys think about how it all connects if you had one which in UML you have an imaginary one
